- Thí sinh **KHÔNG** được sử dụng tài liệu, kể cả từ điển.
- Giám thị **KHÔNG** giải thích gì thêm.

THEME: ARTIFICIAL INTELLIGENCE AND SOCIETY

Question 1. Some people believe that we must be ready for a future where artificial intelligence (AI) will be more intelligent than humans, while others argue that AI will never surpass humans as it is the product of the human mind. Discuss both views and give your opinion.

Question 2. Some people think that there is currently too much attention given to artificial intelligence and that there are other important technological developments that are worth our attention. To what extent do you agree or disagree with this view?

Question 3. Some people believe that in the future, people will not be able to tell the difference between humans and robots. To what extent do you agree or disagree with this view?

Question 4. Some people believe that self-driving vehicles will make roads safer in the future, while others think that they will make driving more dangerous instead. Discuss both views and give your opinion.

Question 5. Some people think that the use of artificial intelligence (AI) will have a negative impact on our language proficiency. Others, however, believe that AI can help us become better at the languages that we speak. Discuss both views and give your opinion.

Question 6. Some people think that artificial intelligence (AI) will help humans make fewer mistakes, while others believe that AI will make it easier for humans to make mistakes. Discuss both views and give your opinion.

Question 7. Works created by artificial intelligence (AI) cannot be considered art, because AI can never be creative. To what extent do you agree or disagree with this statement?

Question 8. The use of artificial intelligence (AI) in research is growing. Some people think that researchers should not use AI when writing research papers. To what extent do you agree or disagree with this view?

Question 9. Some people believe that teachers should no longer assign written homework to their students because it is difficult for teachers to tell whether students have used artificial intelligence or not. To what extent do you agree or disagree with this view?

Question 10. Some people predict that artificial intelligence (AI) will never stop growing. Others, however, think that AI will eventually be replaced by future technological developments. Discuss both views and give your opinion.
